

HEXALIME DEO

Boric and Nitrogen free de-liming agent

HEXALIME DEO

- Suitable for all types of pelts in short and long floats
- **HEXALIME DEO** is used in cold water without fear of acid swelling.
- A quick full deliming is achieved by using **HEXALIME DEO**
- Environment pollutions are reduced by using **HEXALIME DEO** as the release of nitrogen is nil
- **HEXALIME DEO** gives very clean pelts with fine grain
- **HEXALIME DEO** is Boric acid free hence does not give problem in effluent treatment

PROPERTIES

Appearance : White granular powder

Base : Mineral and Organic compounds

pH (1:10) : 2.0 ± 0.5

Solubility : Soluble

Stability : Stable to electrolytes at normal concentrations in tannery

APPLICATIONS

HEXALIME DEO can be used undiluted

Examples of applications:

(% based on pelt weight)

All types of leathers : 1.0-3.0 % (depends on thickness)

STORAGE

HEXALIME DEO has a shelf life of one year if it is stored in its original sealed package.

Bags should be tightly closed each time material is taken from them.
