

HEXAOIL CL

Cationic fat liquor

HEXAOIL CL

- **HEXAOIL CL** highly stable in hard water, acid, chrome and electrolytes it can be used during chrome tanning to achieve uniform penetration of basic chrome sulphate and better uptake of chrome.
- The pelt treated with **HEXAOIL CL** during Chrome tanning gives a very light, uniform and pleasing colour to the wet blue stock.
- **HEXAOIL CL** can also be used with chrome free tanning agents like Glutaraldehyde, THPS, HEXATAN HGA, for uniform distribution and better penetration
- **HEXAOIL CL** will enhance the depth and optic of the dyeing when used in sandwich dyeing which also results in the reduced percentage of dye.

PROPERTIES

Aspect	:	Yellow viscous liquid
Charge	:	Cationic
Solids	:	30 ± 2 %
pH (1:10)	:	3.0 – 4.0
Stability	:	Excellent to salts and acids
Light fastness	:	Excellent

APPLICATIONS

During chrome tanning	:	0.5 – 1.0 % (based on pelt weight)
During wet white tanning	:	1.0– 2.0% (based on pelt weight)
In cationic system	:	0.5 – 1.0 % (based on pelt weight)
Suede	:	1.0 – 6.0 % (based on crust weight)

STORAGE

This product has a shelf life of one year if it is stored in its original sealed packing at temperatures between 5°C and 40°C. Drums should be tightly resealed each time material is taken from them and their content should be used up as soon as possible after they have been opened.

The above information has been given in good faith, with out liability
