

HEXA OIL HA

Multipurpose Dispersing agent

HEXA OIL HA

- An amphoteric dispersing agent, has strong dispersing effect on natural fat and tanning agents.
- Due the amphoteric character, it can be used in all stages of leather processing
- Can be used along with degreasing agents to improve the efficiency of degreasing
- When used along with chrome and mineral tanning agents, it will improve the distribution of the tannins
- It will also improve the stability of the fat liquor emulsions when used along with the fat liquors.
- It will avoid the drawn grain when used in semi chroming

PROPERTIES

Appearance	:	Yellow to reddish brown viscous liquid
Chemical Character	:	Fatty acid derivatives
Active solids	:	50 ± 2 %
pH (1:10)	:	7.5 – 8.5
Charge	:	Amphoteric
Stability	:	Excellent to electrolytes, acids, alkali, and chrome

APPLICATIONS

In pickle/Chrome tanning	:	0.5 – 1.0 % (based on pelt weight)
In washing /wetback of chrome	:	
Semi chrome and Vegetable tanning	:	0.25 – 0.5 % (based on shaved weight)
In main fatliquoring	:	0.5 – 1.0 % (based on pelt weight)
Wetting back of crust leathers	:	1.0 – 2.0 % (based on crust weight)

STORAGE

This product has a shelf life of one year if it is stored in its original sealed packing at temperatures between 5°C and 40°C. Drums should be tightly resealed each time material is taken from them and their content should be used up as soon as possible after they have been opened.
