

HEXATAN HD 7

No formaldehyde Anionic amino resin syntan

Suitable articles

Shoe upper

Bag leather

Automotive

Upholstery

Highlights

Has been developed in accordance with our Objective: Go Green

The product is free from RSL chemicals (Restricted substances list) such as formaldehyde. That is the product was manufactured without using formaldehyde as the condensation monomer. Hence the product has ZERO free formaldehyde. Therefore enable the tanner to work safe and clean environment without any negative effects on leather

HEXATAN HD 7

- **HEXATAN HD 7** has got good filling action particularly in less closely structured parts of the skin. Thus improves the fullness
- **HEXATAN HD 7** will tighten the grain and improves the feel of the leather
- **HEXATAN HD 7** imparts good dye leveling effect thus no problem in dyeing of pastel shades
- **HEXATAN HD 7** Due to less astringency it will not disturb the grain, hence the resultant leather will be flat with fine grain.
- **HEXATAN HD 7** imparts good surface for buffing and embossing

PROPERTIES

Aspect	: Brown colored powder
Chemical character	: Amino resin based on no formaldehyde condensate
Moisture content	: 6.0 % Max.
pH (1:10)	: 8.0 – 9.5
Solubility	: Good
Stability	: Stable to electrolytes at normal concentrations in tannery
Light fastness	: Good

APPLICATIONS

HEXATAN HD 7 can be used up to 5.0 % for all types of leather to get tight grain and

to improve the fullness of loosely structured parts of the leather

STORAGE

The product has a shelf life of two years if it is stored in its tightly sealed original packaging at temperatures between 0°C and 40°C. Bags should be tightly resealed each time material is taken from them, and their contents should be used up as soon as possible after they have been opened.

The above information has been given in good faith, with out liability
