

HEXATAN NGN

Soft polymer for re-tanning

HEXATAN NGN

- Imparts a uniform filling effect with a round handle and leaves the leather with a fine and smooth grain
- When used in re-tanning or fat liquoring will give softness without loose grain
- Highly suitable for lightfast and heat resistant leathers.
- Does not affect hydrophobic properties and can therefore also be used in re-tanning systems for waterproof leathers.
- Usually applied in combination with synthetic, vegetable or resin based re-tanning agents.

PROPERTIES

Appearance	:	Colorless to slightly yellow colored liquid
Chemical Character	:	Acrylic copolymers
pH (1:10)	:	6.5 – 7.5
Solids	:	30 ± 2 %
Solubility	:	Good
Light fastness	:	Excellent
Stability	:	Not stable to concentrated chrome tanning floats

APPLICATIONS

For full grain upper : 2.0 - 4.0 % of **HEXATAN NGN**

(Based on shaved weight)

Water resistant shoe upper : 2.0 -4.0 % of **HEXATAN NGN**

(Based on shaved weight)

Chrome free shoe upper : 2.0 -4.0 % of **HEXATAN NGN**

(Based on shaved weight)

STORAGE

This product has a shelf life of one year if it is stored in its original sealed packing at temperatures between 5°C and 40°C. Drums should be tightly resealed each time material is taken from them and their content should be used up as soon as possible after they have been opened.

The above information has been given in good faith, with out liability
