

# HEXATAN DLF

Special powder resin tanning agent

## HEXATAN DLF

- Special amino resin does not contain added fillers, most suitable for high quality leathers and does not affect the breathability
- Very low free formaldehyde, suitable for automotive and upholstery leathers
- Soft amino resin for obtaining mellowness and roundness recommended during re-tanning of chrome-tanned leather
- Highly penetrative and selective filling in nature
- Imparts good buffability and does not bleach the colour. So, it is useful for the production of Suede and nubuck leather

## PROPERTIES

Appearance	: Light brown Powder
Chemical Character	: Based on amino resins.
Moisture content	: 6.0% Max.
pH (1:10)	: 7.0 – 8.5
Stability	: Stable to electrolytes at usual concentrations
Solubility	: Good
Light fastness	: Excellent

## Examples of applications

**HEXATAN DLF** can be used in all stages for the production of any articles (e.g., uppers, garment, lining etc.)

Upper	: 3.0 – 8.0 % <b>HEXATAN DLF</b> on shaved weight
Garment	: 2.0 – 4.0 % <b>HEXATAN DLF</b> on shaved weight
Light leathers	: 2.0 – 6.0 % <b>HEXATAN DLF</b> on shaved weight
Sheep skins	: 2.0 – 4.0 % <b>HEXATAN DLF</b> on shaved weight

## STORAGE

The product has a shelf life of two years if it is stored in its tightly sealed original packaging at temperatures between 0°C and 40°C. Bags should be tightly resealed each time material is taken from them, and their contents should be used up as soon as possible after they have been opened.
