

HEXATAN FP

Protein filler

HEXATAN FP

- Deposits in the empty parts of the skin, and between grain and the reticular layer.
- Can be added to the chrome tannage, Chrome free tannage or re-tanning to get the following:-
 - Full, Round handle
 - Reduced number of growth mark and improved the selection
 - Smooth, fine and firm grain
 - Better cutting value
 - When used in re-tanning the tightness of fibres is improves and hence it imparts short nap on suede and nubuck.
- Does not bleach the shades as it has got its own receptivity to dyes.
- Environment friendly.

PROPERTIES

Aspect	:	Off white powder
Basis	:	Natural protein with selective filler
Moisture content	:	6.0 % Max.
pH (1:10)	:	5.5 – 7.5
Solubility	:	Easily dispersible in Luke warm water

APPLICATIONS

HEXATAN FP is used in re-tanning and it is offered in powder form after dyes, in short float 5 to 10 minutes before fat liquor to get full, round and tight grain.

During re-tanning:

% based on wet blue shaved weight

Garment sheep skins	:	3.0 – 6.0 %	HEXATAN FP
Thin Upper leather	:	3.0 – 5.0 %	HEXATAN FP
Thick Upper leather	:	2.0 – 4.0 %	HEXATAN FP
Splits	:	4.0 – 8.0 %	HEXATAN FP
Suede leathers	:	3.0 – 5.0 %	HEXATAN FP

During Chrome tanning:

% based on pelt weight

Cow hide : 1.0 – 1.5 % **HEXATAN FP**

Sheep and goat skins : 1.0 – 2.0 % **HEXATAN FP**

STORAGE

The product has a shelf life of two years if it is stored in its tightly sealed original packaging at temperatures between 0°C and 40°C. Bags should be tightly resealed each time material is taken from them, and their contents should be used up as soon as possible after they have been opened.
