

HEXATAN HM

Amino resin syntan

HEXATAN HM

- **HEXATAN HM** is recommended in re-tanning process to fill the loose parts of hides and skins and to level the thickness and fullness of the leather.
- **HEXATAN HM** can be used in combination with syntans and vegetable tanning agents and gives good results when combined with HEXATAN RF and HEXATAN OS.
- When **HEXATAN HM** is used, the buffing effect and print retention will be excellent.
- **HEXATAN HM** will give soft and mild leather, even if used in large quantity.
- **HEXATAN HM** has dispersing effect on anionic re-tanning agents and anionic dyes, which allows through and through dyeing and re-tanning.

PROPERTIES

Aspect	:	Light brown powder
Moisture content	:	6.0% Max.
pH	:	In 10% aqueous solution, 6.5 – 7.5
Light fastness	:	Very Good
Stability	:	Stable to electrolytes at normal concentrations in tannery

APPLICATIONS

HEXATAN HM is added after neutralization, at the beginning of re-tanning and before dyeing.

(% based on re-tanning process)

Sheep and lamb skins	:	2.0 – 4.0 % HEXATAN HM
Goat skins	:	1.0 – 2.0 % HEXATAN HM
Calves	:	2.0 – 4.0 % HEXATAN HM
Hides	:	3.0 – 5.0 % HEXATAN HM

STORAGE

The product has a shelf life of two years if it is stored in its tightly sealed original packaging at temperatures between 0°C and 40°C. Bags should be tightly resealed each time material is taken from them, and their contents should be used up as soon as possible after they have been opened.
