

HEXATAN PW

White syntan based on phenol

HEXATAN PW

- Gives fuller leather with fine and smooth grain.
- Can be used mainly in the production of white and light fast leather.
- Has got very good self-tanning power hence, it can be highly recommended in the production of Chrome free or wet white tanning.
- Enhances excellent light fastness to the leather with more uniform dyeing of pastel color.
- Inert to salts and can be used in all the stages for all types of leather.
- In combination of vegetable extracts improves penetration of tanning with a clear color and elastic grain and it dissolves easily and thus no sludge formation is found.
- Good dispersing effect on the tanning bath.
- Increases the buffing property.

PROPERTIES

Appearance	: Pale yellow powder
Chemical Character	: Phenol condensation product
Moisture content	: 6.0 % Max.
pH (1:10)	: 3.0 – 4.0
Stability	: Stable to electrolytes at usual concentrations
Solubility	: Excellent
Light fastness	: Very good

APPLICATIONS

HEXATAN PW can be used in all stages for the production of any articles (e.g., uppers, garment, lining etc.)

Upper	: 3.0 – 8.0 % (on shaved weight)
Garment	: 2.0 – 4.0 % (on shaved weight)
Light leathers	: 2.0 – 6.0 % (on shaved weight)
Sheepskins	: 3.0 – 7.0 % (on shaved weight)
Chrome free leather	: 8.0 – 12.0 % (on pelt weight)

STORAGE

The product has a shelf life of two years if it is stored in its tightly sealed original packaging at temperatures between 0°C and 40°C. Bags should be tightly resealed each time material is taken from them, and their contents should be used up as soon as possible after they have been opened.
